

PR ORIGIN GLOBAL

GLOBAL EXPORT CATALOG 2026

COCONUT FIBER / COIR

High Tensile Strength * Rot-Resistant * Natural Bristle & Mattress Fiber

Extracted from mature coconut husks, PR Origin Global coir fiber is a highly durable, eco-friendly material trusted in geotextiles, erosion control, mattresses, upholstery, and industrial applications globally. Every batch is meticulously cleaned, graded, and quality-tested for consistent performance.

100% NATURAL

BIODEGRADABLE

HIGH TENSILE

ROT-RESISTANT

EXPORT READY

PR Origin Global * Made in India | Exporting Worldwide

WHY BUYERS CHOOSE PR ORIGIN GLOBAL

Our commitment to quality ensures that industrial manufacturers, agricultural distributors, and geotechnical engineers receive premium-grade coir fiber engineered for performance.

- * **100% Natural, Biodegradable & Renewable:** A sustainable alternative to synthetic fibers.
- * **Superior Structural Integrity:** High tensile strength and excellent durability under stress.
- * **Weather Resilient:** Naturally rot-resistant and highly moisture-tolerant.
- * **Precision Graded:** Uniform grading ensures seamless industrial processing.
- * **Optimized Logistics:** Export-ready compressed bales maximize container loadability.
- * **Customization:** Private label and OEM packaging available for global distributors.

Technical Specifications

Parameter	Typical Export Specification
Fiber Type	Bristle Fiber / Mattress Fiber / Mixed Fiber
Color	Golden brown to dark brown
Fiber Length	Bristle: 5-30 cm / Mattress: 2-15 cm
Fiber Diameter	0.1-0.6 mm
Tensile Strength	100-200 MPa (typical range)
Elongation at Break	15-40%
Density	1.15-1.46 g/cm3
Moisture Content	10-15%
Lignin Content	Approx. 45% (Ensures rot-resistance)
Cellulose Content	Approx. 43%
Impurity / Sand Content	<= 2-3%
Shelf Life	2-3 years when stored dry

Note: Values are indicative. Custom industrial specifications are available upon request.

COIR GRADES & PRODUCT FORMATS

PR Origin Global supplies a comprehensive range of coir fiber formats, customized to fit seamlessly into diverse manufacturing and environmental applications.

Grade / Format	Description	Best For
Bristle Coir Fiber	Long, stiff, golden-brown fibers extracted via specialized defibering.	Brushes, brooms, doormats, geotextiles.
Mattress Coir Fiber	Shorter, curled, softer fibers providing excellent resilience.	Mattresses, upholstery, cushioning.
Mixed Coir Fiber	Engineered blend of bristle and mattress fibers.	General industrial use, automotive padding.
Coir Yarn / Twine	Uniformly spun yarn derived from high-grade coir fiber.	Ropes, nets, mat weaving, hop vines.
Coir Rope	Heavy-duty twisted coir yarn.	Agriculture, marine, packaging, landscaping.
Coir Geotextile	Durable, open-weave or closed-weave coir fabric.	Erosion control, severe slope stabilization.
Erosion Control Blanket	Thick, open-weave coir mesh designed for rapid vegetation.	Landscaping, riverbanks, highway slopes.
Rubberized Coir Sheet	Coir fiber permanently bonded with natural latex rubber.	Mattress cores, automotive acoustic insulation.

INDUSTRIAL & COMMERCIAL APPLICATIONS

1. Mattresses & Upholstery Highly breathable, resilient, and dust-free coir fiber acts as an excellent organic core for premium mattresses, structural cushions, and furniture upholstery padding.	2. Geotextiles & Erosion Control High-tensile coir fiber woven into robust blankets and nets. Essential for civil engineering, slope protection, riverbank restoration, and roadside landscaping.
3. Brushes, Brooms & Doormats Stiff, water-resistant bristle fiber is the global standard for crafting highly durable natural cleaning brushes, commercial brooms, and heavy-duty entrance mats.	4. Ropes, Twines & Packaging Exceptionally strong, rot-resistant coir yarn utilized in agriculture (hop twines), marine ropes, aquaculture, and sustainable eco-friendly packaging solutions.
5. Automotive & Industrial Rubberized coir sheets provide structural insulation, vibration dampening, seating padding, and sound absorption in modern automotive manufacturing.	6. Horticulture & Landscaping Short fibers and mixed grades are incorporated into growing media blends, acting as structural mulch and long-term soil conditioning agents.

Manufacturing Excellence: The 10-Stage Process

[v] 1. Mature Husk Collection
[v] 2. Controlled Retting (Water soaking for fiber softening)
[v] 3. Mechanical Defibering (Separation of pith and fiber)
[v] 4. Cleaning & Dust Removal
[v] 5. Precision Grading & Sieving
[v] 6. Sun-Drying / Mechanical Drying (Moisture reduction)
[v] 7. Laboratory Quality Testing
[v] 8. Hydraulic Baling (High-density compression)
[v] 9. Palletized Packing & Strapping

MANUFACTURING QUALITY ASSURANCE & EXPORT LINE

Every consignment of PR Origin Global coir fiber is processed through state-of-the-art hydraulic balers and tested in our on-site laboratories to meet rigorous international tensile, moisture, and purity standards before maritime container stuffing.

Stage Highlight 01: Mature Husk Sourcing

Harvested exclusively from mature coconut palms (>11 months) ensuring high lignin concentration (approx. 45%) for maximum rot resistance and structural elasticity.

Stage Highlight 02: Precision Mechanical Defibering

Turbo-drum defibering separators isolate long bristle strands from cushioning mattress fibers while stripping dust, sand, and extraneous pith matter.

Stage Highlight 03: Sun-Drying & Laboratory Verification

Hygienic open-air drying platforms and hot-air tunnels reduce moisture to the strict 10-15% export window, preventing mold formation during maritime container transit.

Stage Highlight 04: Multi-Ton Hydraulic Compression

100-125 kg high-density bales strapped with UV-stabilized plastic bands or steel wire, optimizing ocean freight container loadability up to 26 MT per 40ft High Cube.

PR ORIGIN GLOBAL - QUALITY GUARANTEED EXPORTS

All export consignments are inspected for tensile integrity, fiber length distribution, and phytosanitary compliance prior to customs dispatch from Indian ocean terminals.

Tuticorin & Cochin Sea Ports, India * Direct Vessel Connections Worldwide

PACKAGING, LOGISTICS & QUALITY ASSURANCE

Packaging & Global Logistics

Format	Weight / Size	Container Loadability
Compressed Bales	100 - 125 kg	20ft: 12-14 MT / 40ft HC: 24-26 MT
Small Bales	20 - 50 kg	Custom loaded based on palletization
Coir Yarn Hanks	10 - 25 kg	Custom loaded
Coir Rope Coils	10 - 50 kg	Custom loaded
Geotextile Rolls	Custom width/length	Custom loaded to maximize volume

MOQ: 1 pallet for trial orders / 1 FCL for wholesale.

Incoterms: FOB, CIF, CFR.

Port of Loading: India.

Private Label / OEM: Available for all compressed bales and retail formats.

Certifications & Quality Standards

PR Origin Global guarantees uncompromised quality through rigorous international compliance:

- * ISO 9001:2015 Certified Quality Management System
- * Coir Board Registered Exporter (Government of India)
- * Phytosanitary Certificate issued for every export shipment
- * ISPM 15 Compliant Heat-Treated Export Pallets
- * OMRI Listed & RHP Certified (For applicable horticultural coir grades)
- * Batch Traceability & Lab Testing for moisture, impurities, and tensile strength
