PR ORIGIN GLOBAL PREMIUM COCOPEAT

100% Natural, Buffered & Organic Growing Media Solutions

PR Origin Global Export Division * www.proriginglobal.com * contact@proriginglobal.com

About PR Origin Global

PR Origin Global is a premier manufacturer and international exporter of high-grade organic growing media. We harness advanced washing, buffering, and compression technologies to transform raw coconut husks into premium, eco-friendly substrates. Serving commercial growers, greenhouse operators, and agricultural distributors worldwide, our products provide exceptional aeration, water retention, and structural stability.

Our Commitment: Every batch produced by PR Origin Global adheres to strict international export standards, ensuring pathogen-free, uniform, and sustainable peat-free cultivation.

Core Technical Specifications

Parameter	Standard Value	Testing / Export Notes
pH Range	5.5 - 6.8 (Low EC) / 5.4 - 6.4 (High EC)	1:1.5 Water Extraction Method
Electrical Conductivity (EC)	Low EC: < 0.5 mS/cm; High EC: < 0.9 mS/cm	1:1.5 Extract (dS/m at 25°C)
Moisture Content	10% - 15%	Sun-dried, optimized for safe maritime transit
Compression Ratio	5:1 (Blocks) / 8:1 (Briquettes)	High hydraulic density for logistics efficiency
Expansion Rate	12 - 18 Litres per kg	Grade-dependent volumetric yield
Sand & Impurity Content	<= 2%	Cleaned via advanced mechanical screening

Cocopeat Grades & Particle Sizing

PR Origin Global processes raw pith into specific particle structures designed to match diverse root zone requirements and c

HYDRAULIC COMPRESSED 5KG BALES

- * Uniform 30x30x10cm calibrated dimension
- * Expands to 75 - 80 Litres upon hydration
- * Triple-washed freshwater desalinated grade

Fine Grade (4-6 mm)

Expansion: 15 L/kg

Best For: Seed raising trays, turf dressing, golf greens, and plug propagation.

Benefits: Rapid water uptake and superior seed-to-media contact.

Standard Grade (8 mm)

Expansion: 18 L/kg

Best For: Potting mixes, nurseries, and landscaping soil conditioning.

Benefits: Balanced aeration and moisture holding capacity.

Coarse Grade (Un-sieved)

Expansion: 12 L/kg

Best For: Cool-season crops, orchids, and high-drainage setups.

Benefits: Enhanced macro-porosity and root oxygenation.

Fibre-Mixed Blend

Expansion: Custom (Varies)

Best For: Strawberry grow bags and long-cycle crops.

Benefits: Incorporates 10%-30% natural coir fibers for longevity.

Commercial Product Formats & Packaging

Our products are custom-packaged to suit commercial greenhouse operations, retail distribution networks, and bulk horticultural blending plants.

Product Format	Dimensions / Weight	Volumetric Expansion	Primary Application
5 kg Compressed Blocks	30 x 30 x 10 cm 5.0 kg	75 - 80 Litres	Commercial nurseries and greenhouse substrate preparation.
650 g Briquettes	20 x 10 x 5 cm 0.65 kg	9 Litres	Retail garden centers and urban home gardening.
Grow Bags / Slabs	100 x 18 x 4 cm (Compressed)	Expands to 100 x 18 x 16 cm	Hydroponic tomato, pepper, and berry production.
25 kg Loose Bags	Heavy-Duty Poly Bag	200 Litres	Ready-to-use potting lines requiring zero pre-soaking.

Manufacturing Excellence: The 10-Stage Process

At PR Origin Global, quality is guaranteed through a rigorous 10-stage production methodology:

1. Husk Selection (semi-mature coconuts)	6. Precision Sieving & Grading
2. Controlled Retting	7. Calcium-Magnesium Buffering
3. Mechanical Defibering	8. Hydraulic Compacting
4. Multi-Stage Fresh Water Washing	9. Laboratory Quality Testing (EC, pH, Sand %)
5. Sun-Drying (below 15% moisture)	10. Palletized Export Packing

Sector-Specific Applications & Certifications

1. Hydroponics & Controlled Environment Agriculture

Our buffered low-EC coco peat slabs provide an inert, sterile root zone with optimal cation exchange capacity, widely deployed in drip-irrigated commercial greenhouses.

2. Professional Horticulture & Landscaping

Replaces traditional peat moss in seedling trays and container nurseries, eliminating soil-borne pathogens while improving moisture retention in arid climates.

Global Market Certifications & Quality Assurance

Certified Compliance:

PR Origin Global products meet stringent international standards, holding ISO 9001:2015 (SGS & UKAS), OMRI Certification for organic production, RHP European Standards, and full Phytosanitary export clearance with ISPM 15 heat-treated pallets.

Logistics & Ordering Information

Supplied in 40ft High Cube containers (approx. 24-26 metric tons per FCL). Minimum Order Quantity (MOQ): 1 pallet for trial orders or 1 full container load (FCL) for wholesale distribution. Custom private labeling and OEM packaging available upon request.
